Juan [Last Name]

Toronto, Ontario | [email] | [phone]

Profile

Software Engineering - AI student at Centennial College in Toronto, originally from Colombia and fluent in English and Spanish. I build websites, Python and C# programs, database queries and Linux setups, and I like turning class projects into things people can actually use. Looking for part-time work where I can learn fast and be useful from day one.

Education

Centennial College, Toronto, Ontario
Software Engineering - AI (in progress)
Coursework: database concepts, web development, networking and Linux, software requirements engineering, C# programming, Python

Technical Skills

- **Languages:** Python, C#, Java, JavaScript, SQL (Oracle), HTML, CSS
- **Web:** React, jQuery, AJAX, Chart.js, Cypress testing, REST APIs (GIPHY)
- **Systems and tools:** Linux, Bash scripting, SSH and SFTP, Samba, firewall rules, Git, Jupyter Notebook
- **Languages spoken:** English and Spanish (bilingual)

Projects

Sabor Colombiano, restaurant website (COMP125)

- Built a multi-page Colombian restaurant site on my own, adding jQuery interactions, an AJAX search backed by a Perl CGI script and a GIPHY API feed.
- Wrote Cypress end-to-end tests and a drag-and-drop jigsaw puzzle to check that the site worked the way visitors would use it.

ZeroWaste Bites, AI food waste app (COMP225)

- Worked in a group to specify an app that helps people waste less food, producing UML state and sequence diagrams, use case tables and Software Requirements Specification sections across three parts.

AI Portfolio Website (COMP213)

- Designed and built a multi-page portfolio with Chart.js visualizations and JavaScript demos that simulate AI ideas, in a dark navy and electric blue theme.

Raspberry Pi Server (COMP301)

- Set up a Raspberry Pi with Jellyfin, Samba file sharing, SSH, SFTP, firewall rules and port forwarding, and automated tasks with Bash scripts and Makefiles.

Work Experience

Part-time roles in food service, retail and customer service

- Worked directly with customers in fast-paced settings, which taught me to stay patient, organized and friendly under pressure.
- Balanced work with my full-time studies, with weekend, Monday and Tuesday availability.

Interests

Soccer and sports, and building personal web projects such as a birthday website.
